The Difference Between **Reference and** **Creative Media** *is their Direction*

The seller's effort to stimulate demand is well carried by outgoing, extensive, display media, but—

he should remember that initiative rests with the buyer, and when the hunt for the goods begins, creative media which may have built up the demand, are at a disadvantage.

It is the difference between *coming* and *going*.

The creative advertising is *going* after the prospect, to make him want to buy, but when you have him *coming*, reference media should be used to connect the demand with the local supply. Every effort should be made to *direct* the purchaser to the goods advertised, at the point where they may be seen.

It is here that reference media, directories, find their logical place in the cycle of the sale.
